Uttar Pradesh, India · Remote

Software engineer with 11+ years building and leading back-end systems in PHP, Laravel, Symfony and Drupal, from REST APIs to multi-tenant products and audit-grade accounting software. I own work end to end: design, code, testing and the fixes after launch.

EXPERIENCE

Independent Contractor – Engineer · OTTera, Inc. Jan 2026 – Present
Los Angeles, USA · Remote

- Engineering in PHP and Drupal for a streaming platform company.

Lead Engineer · R Systems Mar 2022 – Dec 2025
Noida, Uttar Pradesh · Remote
Project Leader (Mar 2022 – Feb 2025) → Lead Engineer (Mar 2025 – Dec 2025)

- Led the engineering team: set direction, planned and prioritised workloads, and delivered major milestones ahead of schedule.
- Worked directly with clients to turn requirements into technical plans for new features, aligned with their business goals.
- Designed and built Drupal (PHP) solutions, and led back-end development on Symfony and REST APIs.

Software Engineer · Glocal View Dec 2020 – Feb 2022
Noida, Uttar Pradesh

- Back-end web development with Symfony on the LAMP stack.

Software Engineer · Kalinga Software Mar 2015 – Nov 2020
Ajmer, Rajasthan · On-site at Mayo College

- Developed and supported the e-IMS ERP in Classic ASP, VB.NET, SQL Server and Crystal Reports.
- Built POS and automation apps for the library, cafe and boys' store in C# .NET, with barcode, RFID and biometric hardware.
- Worked directly with end users to design, document and train on new tools.

PROJECTS

Mini-Banking · Co-operative Society Management System Laravel 10 · MySQL · PHPUnit
Banking and accounting system for an employee co-operative society with 430+ members, replacing paper ledgers. Full-stack role: data model, accounting design, business rules, UI, reports, testing and security hardening.

- Double-entry accounting with reversal-only corrections and locked financial years; loans with two-guarantor consent; role-based access and an append-only audit log.
- Hindi/English statutory statements that match the audited 2025-26 accounts line for line, locked in by tests; OWASP-style review with all critical and high findings fixed.

IPBX Admin Portal · School telecom platform Laravel · Sanctum · MySQL · Queues
Multi-tenant telecom platform for schools with prepaid wallet billing, role-based admin access, automated credit policies and a rate-limited Sanctum REST API.

Guest Management · Visitor management platform Laravel · Livewire
Fast, secure visitor check-ins with guest records and approvals, for offices, events, hotels and institutions.

SKILLS

PHP	Laravel, Livewire, Symfony, Drupal, CodeIgniter, WordPress
API	REST, Sanctum, Node.js
Testing	PHPUnit, QA & security reviews
Data	MySQL, SQL Server, MS Access
Front end	JavaScript, jQuery, Angular, Bootstrap, Chart.js
Microsoft	C#, VB.NET, ASP.NET, Classic ASP, IIS, Crystal Reports

EDUCATION & TRAINING

B.Tech, Information Technology · Grade A
Priyadarshini College of Computer Sciences,
Greater Noida (AKTU) · 2010 – 2014
C# .NET and ASP.NET · Kirnani Technologies, Ajmer
· 2015
Java · HCL Technologies, Noida · 2014
Languages: English, Hindi
